

Communication

Date	05 July 2026
Team ID	SWTID-2026-1614
Project Name	A Comprehensive Measure of Well-Being
Maximum Marks	1 Mark

Communication Plan:

Effective communication is essential for a successful project demonstration. This document outlines the communication strategy used within the team and with stakeholders throughout the project lifecycle, including how updates, issues, and feedback were managed.

S.No	Communication Type	Frequency	Channel / Tool	Participants	Purpose
1	Team Standup	Daily	WhatsApp group chat		Quick status check-in on what each member is working on that day.
2	Progress Update	Daily	Google Meet		Review overall sprint progress, demo completed features, and re-prioritize pending tasks.
3	Issue / Bug Discussion	As Needed	WhatsApp / GitHub Issues		Flag and resolve blockers such as model errors, deployment failures, or merge conflicts.
4	Stakeholder Review	Bi-Weekly	Google Meet		Present progress to the mentor, gather feedback, and align on next steps.
5	Final Demo Rehearsal	Once	Google Meet (screen share)		Walk through the live model demo end-to-end before the final presentation.
6	Code Review / Merge Discussion	As Needed	GitHub (pull requests) / WhatsApp		Review code changes before merging to keep the main branch stable.

Communication Challenges & Resolutions:

S.No	Challenge Faced	Resolution / Action Taken
1	Coordinating schedules across team members with conflicting class/college timings.	Fixed a recurring daily WhatsApp check-in time and a weekly Google Meet slot that worked for everyone.
2	Merge conflicts when multiple members edited the same codebase files (e.g., Flask/app.py or templates).	Adopted short-lived feature branches and reviewed pull requests on GitHub before merging into the main branch.
3	Keeping the project mentor updated on development progress without scheduling daily meetings.	Sent a brief written progress summary before each bi-weekly stakeholder review to keep discussions focused.
