

Demonstration of Proposed Features

Date	05 July 2026
Team ID	SWTID-2026-1614
Project Name	A Comprehensive Measure of Well-Being
Maximum Marks	1 Mark

Demonstration of Proposed Features:

This document captures all the features that were proposed during the project planning phase and tracks whether each feature was successfully implemented and demonstrated. It serves as evidence of the team's ability to deliver on the proposed solution.

S.No	Feature Name	Description	Status (Implemented/Partial/Pending)	Demonstrated (Yes/No)	Remarks
1	Socio-Economic Input Form	Frosted glassmorphism form for manual entry of target parameters (Life Expectancy, Schooling, GNI).	Implemented	Yes	Working end-to-end on the live web deployment.
2	Country Autocomplete Search	Input search box that pulls baseline socio-economic metrics for 195 countries to auto-populate the form.	Implemented	Yes	Fully functional and validated.
3	HDI Prediction Engine	Pre-trained Linear Regression model calculates predicted HDI scores based on submitted variables.	Implemented	Yes	Core ML model executing inference logic accurately.
4	Development Tier Classification	Categorizes the numeric predicted score into standard tiers (Low, Medium, High, Very High) with colored badges.	Implemented	Yes	Displayed dynamically on the result card interface.
5	Data Preprocessing	Gathers, cleans, and structures historical indicator records to serialize model coefficients.	Implemented	Yes	Training dataset prepared and model weights exported successfully.
6	Web Deployment	Flask backend and UI assets hosted and served as a public cloud service.	Implemented	Yes	Live on the project's hosted deployment URL.

Feature Implementation Summary:

Total Features Proposed	6
Total Features Implemented	6
Total Features Demonstrated	6
Overall Implementation Rate (%)	100%
