

Project Demo Planning

Date	05 July 2026
Team ID	SWTID-2026-1614
Project Name	A Comprehensive Measure of Well-Being
Maximum Marks	1 Mark

Project Demo Planning:

A well-structured demo plan ensures that the team presents the project effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities of each team member.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Problem & Solution	One-line problem statement (analysts lack an interactive tool to model HDI target variables) and one-line solution (HDI Predictor: ML-based prediction dashboard).	0.5	
2	Live Demo: Data Entry & Prediction	On the live app, enter a country baseline, modify health/schooling targets, and show the predicted HDI score and developmental tier classification.	1.5–2	
3	Tech Stack & Deployment	One line: "Built with Python-Flask and a scikit-learn Linear Regression model, deployed live on the web."	0.5	
4	Closing & Future Scope	One line on what's next (multi-country comparison panel, interactive map selection integration) and thank the audience.	0.5	

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	One sentence only: policy analysts struggle to model national development progress without dedicated real-time simulation tools.
2	Solution Overview	Describe the project architecture, technologies, and prediction workflow.
3	Live Feature Demonstration	The core of the demo. Enter indicators on the live web deployment, submit, and display the predicted HDI score and developmental tier.

4	Q&A; Session	Answer questions, discuss future enhancements (like interactive global mapping), and conclude the demonstration.
